Results for period ended May 2023 (Sales by product)

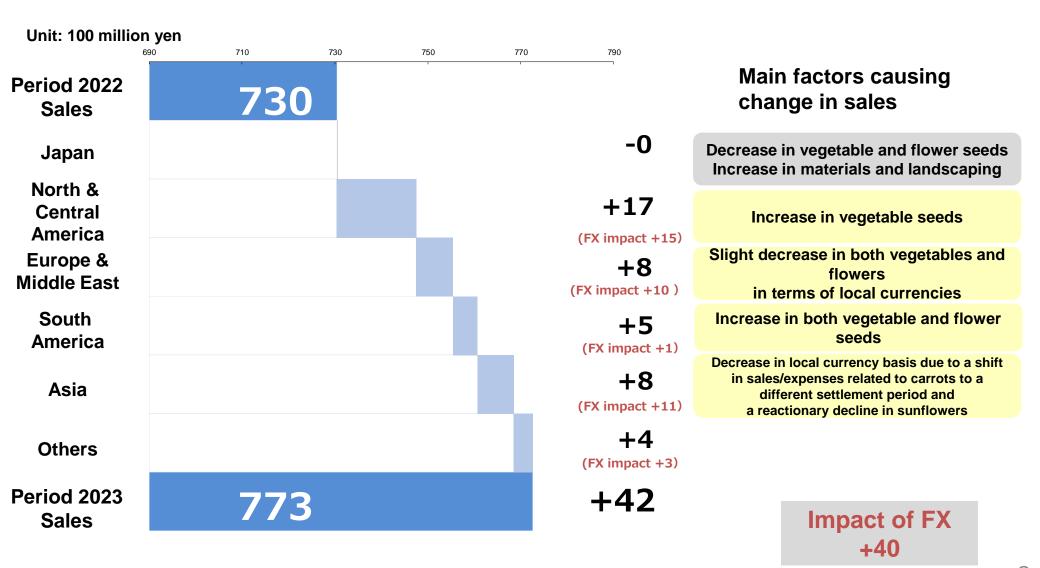

Significant increase in vegetable seeds

Results for period ended May 2023 (Sales by customers' region)

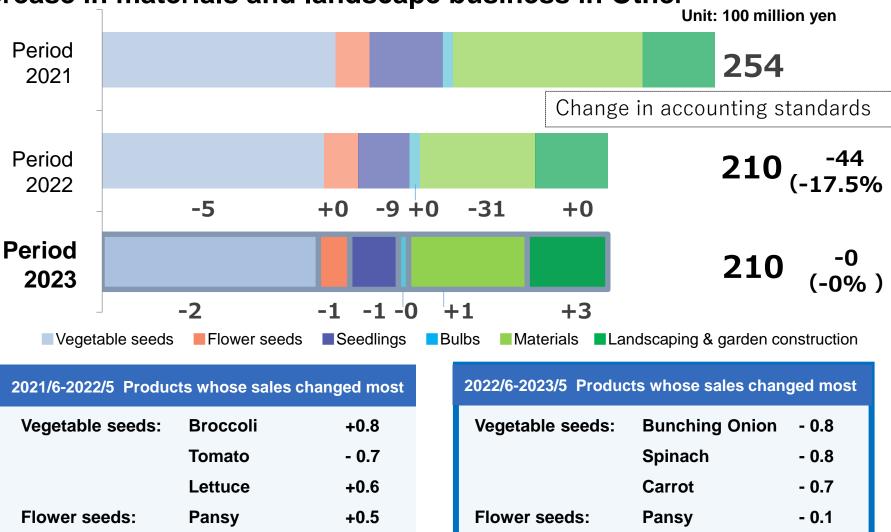

Increase in all overseas regions due to foreign exchange fluctuations

Sales by region for period ended May 2023 (1) [Japan]

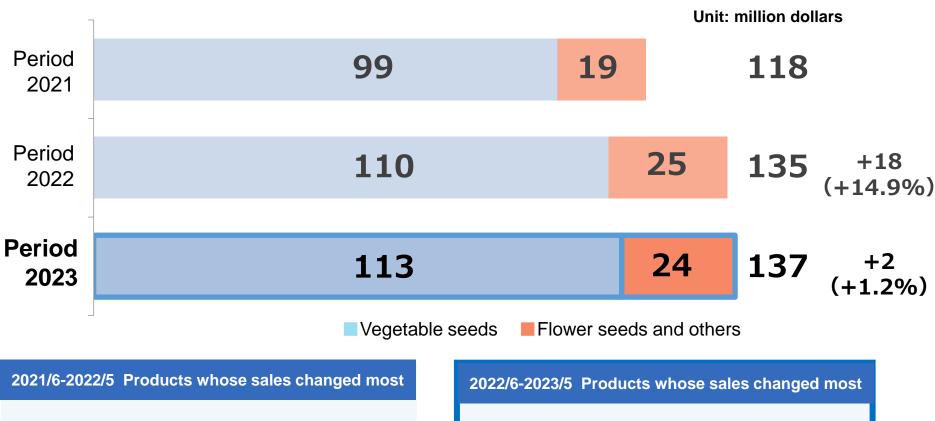

While decrease in vegetable and flower seeds, increase in materials and landscape business in Other

Sales by region for period ended May 2023 (2) [North and Central America]

Increase in sales due to good sales of vegetable seeds

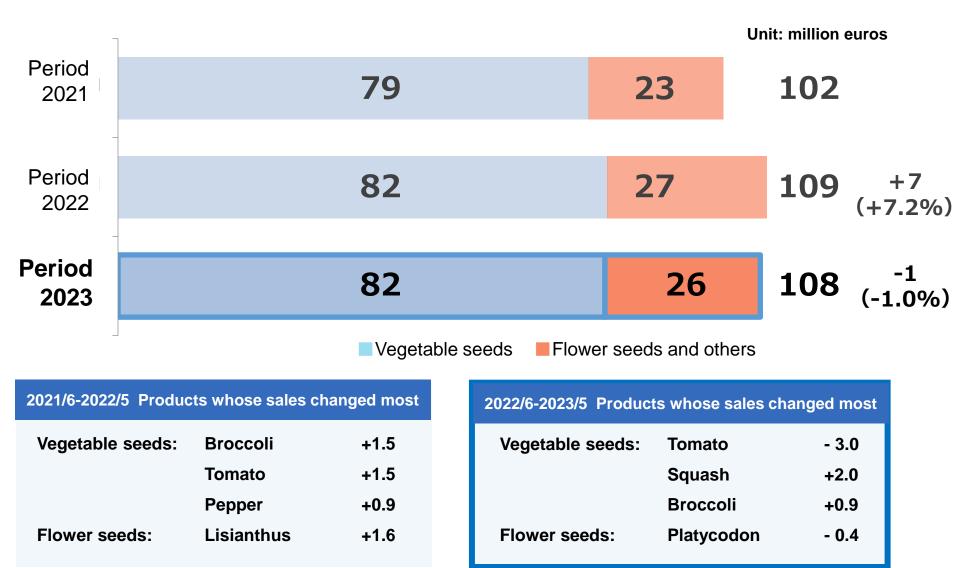

2021/6-2022/5 Products whose sales changed most							
Vegetable seeds:	Broccoli	+5.1					
	Carrot	+1.6					
	Tomato	+1.5					
Flower seeds:	Sunflower	+2.1					

2022/6-2023/5 Products whose sales changed most							
Vegetable seeds:	Broccoli	- 2.6					
	Pepper	+2.3					
	Spinach	+1.8					
Flower seeds:	Lisianthus	+0.7					

Sales by region for period ended May 2023 (3) [Europe and Middle East]

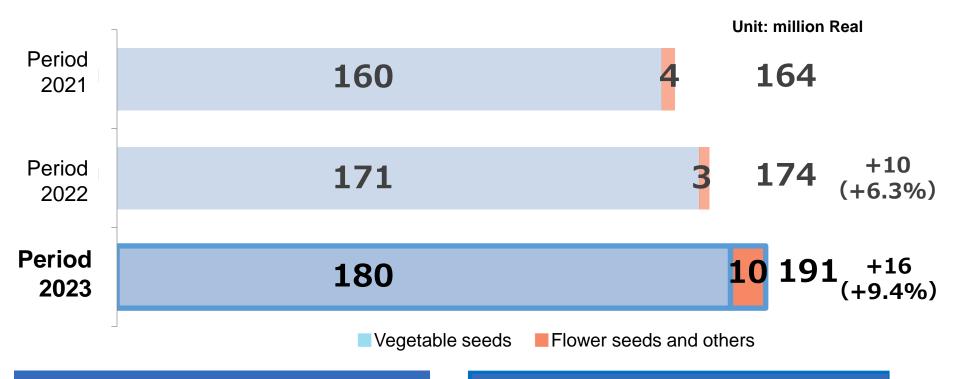

Slight decrease in both vegetable and flower seeds in terms of local currencies

Sales by region for period ended May 2023 (4) [South America]

Good sales in both vegetable and flower seeds

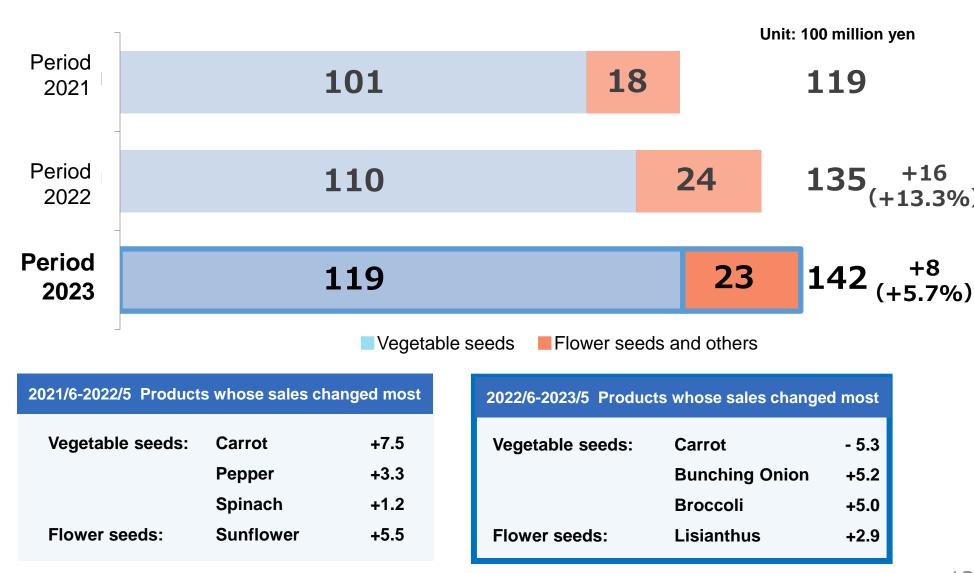

2021/6-2022/5 Products whose sales changed most							
Vegetable seeds:	Squash	+2.9					
	Melon	+2.2					
	Lettuce	+2.1					
Flower seeds:	Sunflower	+1.2					

2022/6-2023/5 Products whose sales changed most							
Vegetable seeds:	Squash	+7.3					
	Melon	- 4.9					
	Pepper	+4.8					
Flower seeds:	Lisianthus	+0.5					

Sales by region for period ended May 2023 (5) [Asia]

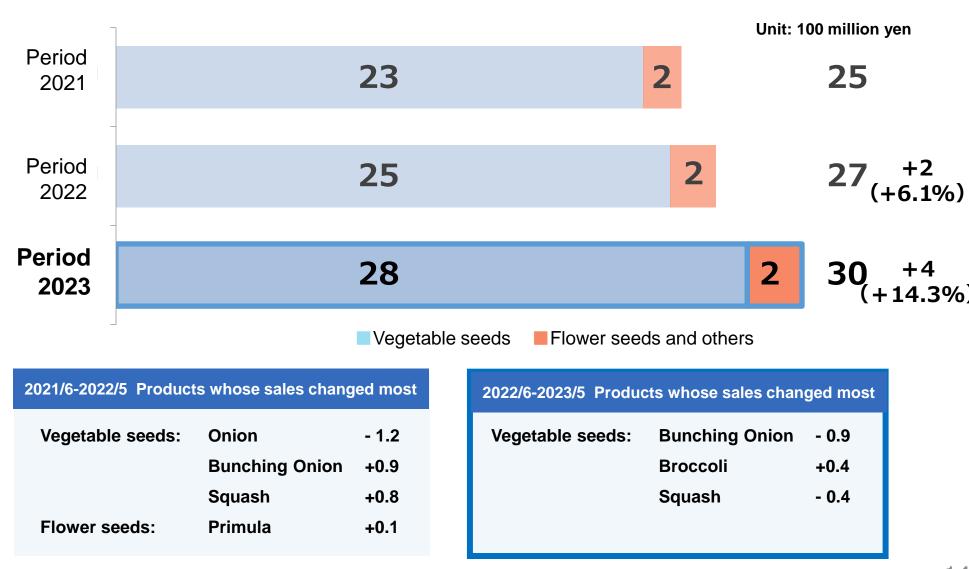

Increase due to the impact of foreign exchange rates

Sales by region for period ended May 2023 (6) [Other regions (Africa and Oceania)]

Increase in vegetable seeds

Main selling, general and administrative (SGA) expenses for period ended May 2023

Increase in expenses for personnel, travel and R&D

Unit: 100 million yen

(Breakdowns given on the basis of locations of head office and major subsidiaries)

		SGA expenses	Personnel expenses	Travel expenses	Depreciation	R&D expenses*

III Action for Global Growth

Growth in Indian Market and R&D for Tropics

1 Growth strategy of SAKATA Group

2 Investment and growth in Indian market

3 R&D for tropics

1. Growth Strategy of SAKATA group

R&D Dept.
Sales & Marketing Dept.

Establishment of a profitable business model

Establishment of healthy profit structure and promoting key strategies in each region

Development of a global supply chain to boost supply reliability and efficiency

Internal structural development to foster global enterprise growth

Supply Chain Dept.

Administration Dept.

Development of global IT infrastructure to improve the efficiency of management

Corporate Management Dept.

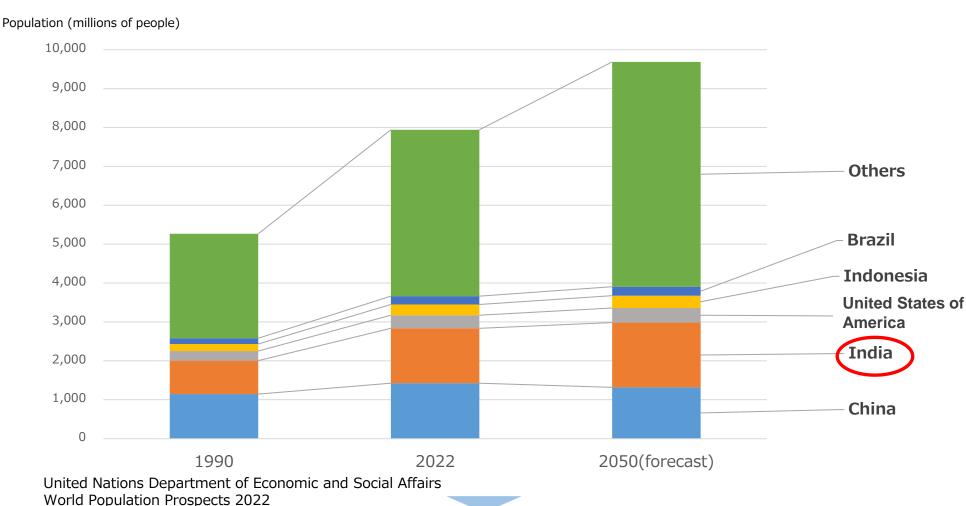

Growth in Indian Market and R&D for Tropics

- 1 Growth strategy of SAKATA Group
- 2 Investment and growth in Indian market
- 3 R&D for tropics

Market potential of India: Increasing population

Largest population in the world, further growth expected per 2050 forecast

Market potential of India: Dietary culture focused on vegetables

Indian food with large amounts of vegetables

Market potential of India: Lifestyle and culture using large amounts of flowers

Flower shop in market

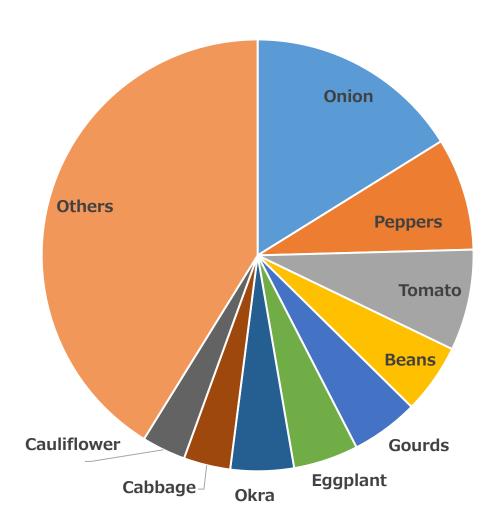

Flowers are essential for celebrations and ceremonies

Market potential of India: Status of vegetable crop area and seed market

Major vegetable crop area ratio in India

Market scale of vegetables and flowers in India

Vegetables

[Monetary amount of seed wholesales]

Approx. 700 million USD

[Crop area]

10.96 million hectares

[Production amount]

202 million tons

[Monetary amount of fruit & vegetable wholesales]

Approx. 9.850 billion USD

Flowers

[Crop area]

280 thousand hectares

[Production amount]

28 million tons

[Monetary amount of flower wholesales]

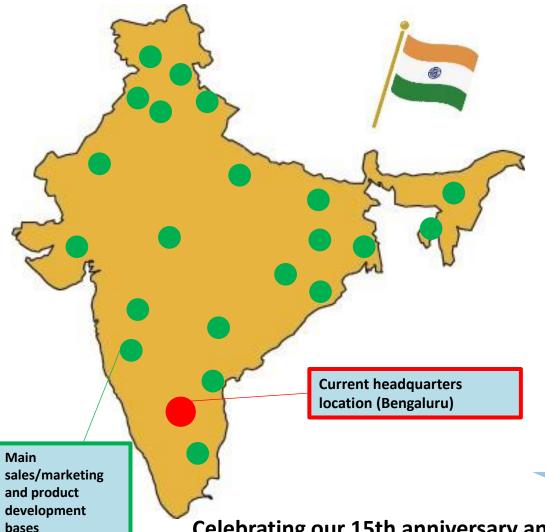

Approx. 2.9 billion USD

(the above figures are tabulated by

SAKATA SEED CORPORATION)

Overview of local subsidiary in India: Establishment of R&D stations and sales/marketing network through India

Sakata Seed India Pvt. Ltd.

2008: Established in suburb of New Delhi

2010: Established a research station in Bengaluru

[No. of employees] 164

[Customers/agents] Approx. 500 companies throughout India

(Construction of sales network that covers the entire country)

[Trial cultivated land] Large number throughout India

Celebrating our 15th anniversary and growing into a major seed company in India

Market strategy in India: Three basic strategies

Strategy (1): Differentiation from other companies

- Concentration in highly-profitable products
- Development of new vegetable markets
- Take on the challenge of new products of flowers

Strategy (2): **Strengthening of R&D**

Enhancement of R&D functions and expansion of local breeding

Strategy (3): Strengthening of governance

Relocation of headquarters and aggregation of functions

Market strategy in India: Differentiation from other companies

—Concentration in highly-profitable products

Toward a lineup focused on original F₁ varieties

Tomatoes

Okra

Hot peppers

Cucurbits

Cauliflower

Cabbage

Package of seeds sold in India

We have been also significantly increasing the ratio of other original F_1 varieties such as beets, broccoli, and squash

Establish a product lineup different from other companies

Market strategy in India: Differentiation from other companies

Provide cultivation information to producers

Development of new vegetable markets
 Provide recipes to consumers

Website: Broccoli Lovers https://broccolilovers.com/hi/

Infrastructure development

• Growth of cold chain logistics market in India
CAGR 14% from 2020 to 2025 (Source: Mordor Intelligence)

Detailed dissemination activities from production to consumption; also driven by infrastructure development

Market strategy in India: Differentiation from other companies

—Take on the challenge of new products of flowers

Propose Sunflowers as decorations for temples

- Proposes the 'Vincent's series of Sunflowers for cut flowers, which have been sold worldwide
- Collaborate with historic temples to determine marketability

Innovative approach to create a new flower culture

Market strategy in India: Strengthening of R&D

—Enhancement of R&D functions and expansion of local breeding

Breeding

- Local research stations (Tomatoes, Hot Peppers, Okra, Gourds, etc.)
- Research expenses CAGR approx. 23% (2011 to 2023)

Expand research facilities

Biotechnology research facility

Pathology research facility

Disease-resistant F₁ Okra: Simba

Diseases resistance against two types of viruses. Highly evaluated in India. Sales are steadily increasing and it is a hit product. As an essential ingredient in curries and soups, okra is an important item in the Indian market.

2 Investment and growth in Indian market

Market strategy in India: Strengthening of governance

—Relocation of headquarters and aggregation of functions

2019 Established the Bengaluru Innovation Center (BIC)

A new comprehensive base centered on logistics functions

2023 Moved headquarters to the BIC

Accelerate decision-making by integrating management, administration, research, production, logistics, quality control, sales, and marketing

Bengaluru Innovation Center

Bengaluru Research Station

Website renewal for 15th anniversary

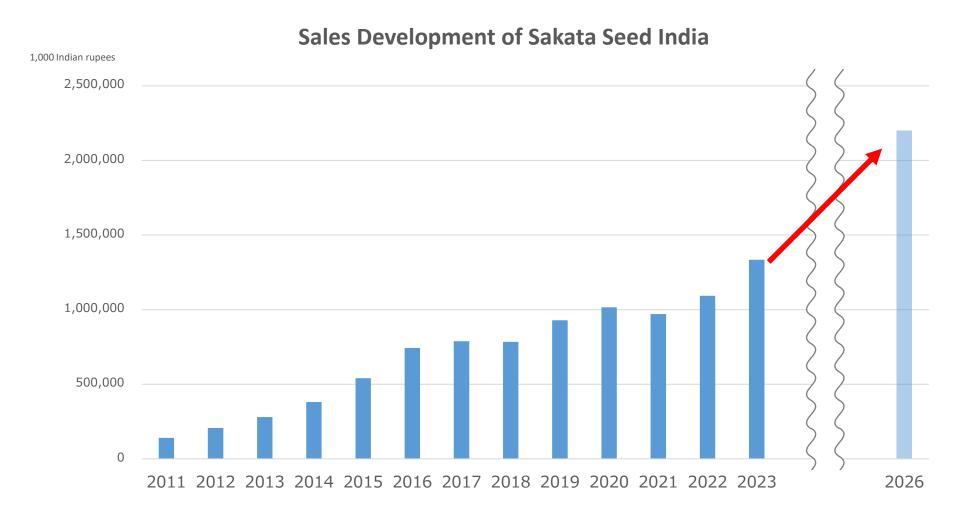

In 2023, Sakata Seed India renewed its website on the occasion of its 15th anniversary. https://sakata.co.in/

Cultivating teamwork together with pursuing efficiency

2 Investment and growth in Indian market

Market prospects in India: Toward further increase of sales

Sales goal (2026) 2.2 billion rupees

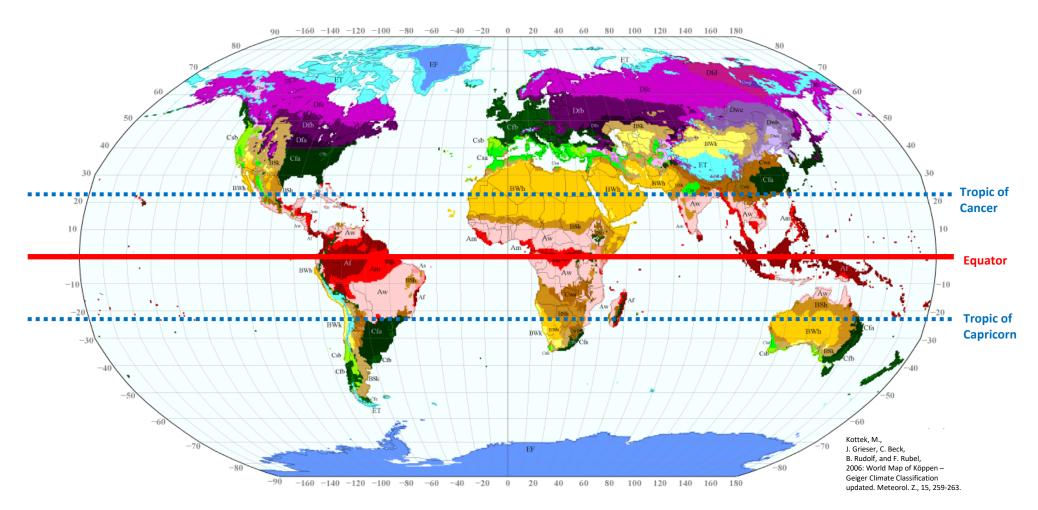

Growth in Indian Market and R&D for Tropics

- 1 Growth strategy of SAKATA Group
- 2 Investment and growth in Indian market
- 3 R&D for tropics

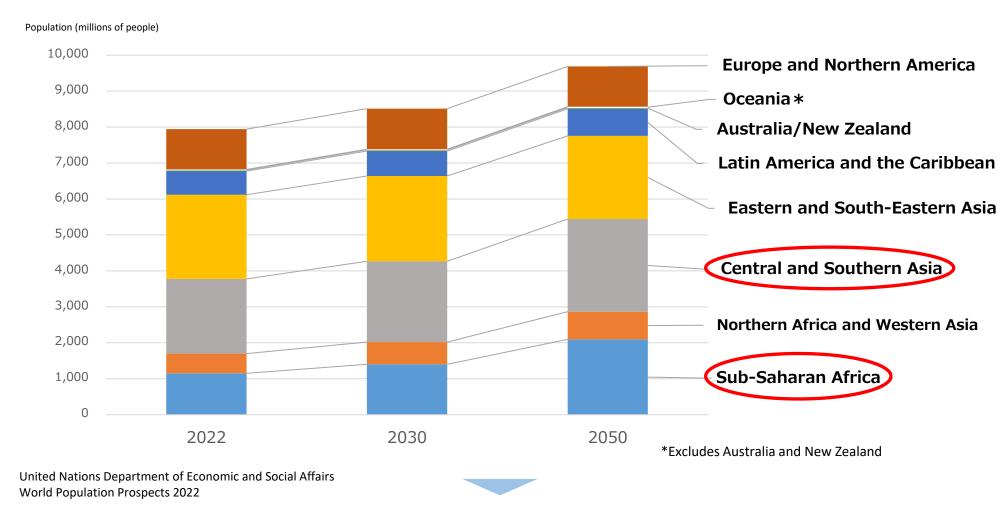

Potential of tropics: Account for 36% of the world's land

Tropics = Region between the Tropic of Cancer and Tropic of Capricorn

Potential of tropics: Increasing population

By 2050, the tropics will be home to half of the world's population and will be a giant seed market

Characteristics and themes of tropics

Regional characteristics

Climate and environment

- Severe natural environment except for highlands
 - → High temperatures, dry, heavy rain, high humidity
- High level of biodiversity
 - →Many types of diseases and pests
- Barren land
 - →Outflow due to high temperatures and rain

Cultivation

- Mainly open field cultivation
 → Unable to control growing environment
- **Technology and human resources**
- Agricultural technology and cultivation methods are underdeveloped

- Hardy and robust varieties
- Disease and pests resistant varieties
- Low fertilizer demand varieties
- Easy growing varieties

Varieties that have a wide range of adaptability and can be harvested even in harsh cultivation environments

Difficult to meet demand through breeding or introducing varieties

SAKATA's strengths in R&D

Extensive genetic resources that can be used in the tropics

- Many years of breeding in the harsh Japanese climate
- Genetic resources from Brazil and other South American countries are also useful

Utilize existing bases in the tropics (India, Thailand, and Brazil)

- · Enhanced trial cultivated land in each country
- Easy prototyping of varieties developed in other regions

Breeding by teams Global cooperation in R&D

- Thorough team system rather than individual breeding
- Promotion of breeding programs between bases

Use genetic resources and global networks to actively take on challenges

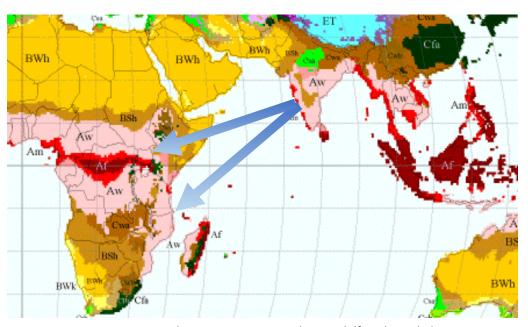

Prospects in Africa

India as a foothold

- India and Sub-Saharan Africa are in the same climate classification
- Almost entirely open field cultivation
- Structure of farming villages is similar

Competitive advantages in developing the African market

- Shared food culture, high possibility of using the same varieties
- Results in sales of varieties bred in Thailand and Brazil

Kottek, M., J. Grieser, C. Beck, B. Rudolf, and F. Rubel, 2006: World Map of Köppen – Geiger Climate Classification updated. Meteorol. Z., 15, 259-263.

Quickly respond to future growth of African market by expanding Indian varieties

Vegetables nourish the body and flowers nourish the soul

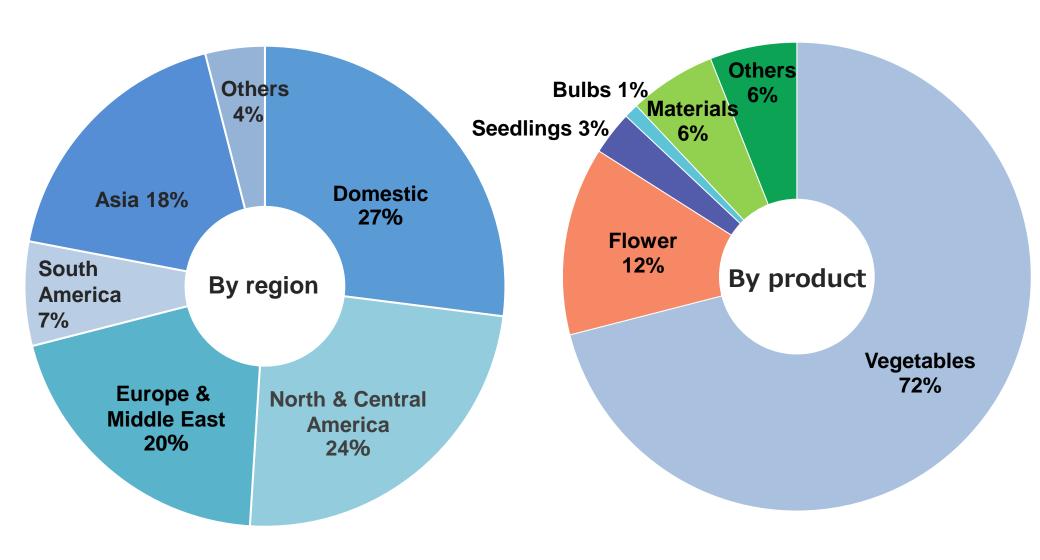

We aim for sustainable development of the environment,
society,
and agriculture and horticulture

IV Appendix

Attention regarding forecasts

This presentation document includes descriptions and materials on forecasts regarding performance, strategies and business plans of Sakata Seed Corporation. Those descriptions and materials are the Company's estimates based on information available at the time of announcement, not facts in the past.

Also, they include potential risks and uncertain elements such as economic circumstances, conditions of competition with other companies, and foreign exchange rates. Therefore, please acknowledge that the Company's actual performance, business development or financial conditions may turn out very different to the forecasts given herein due to various economic, social and political factors, including economic circumstances, competition in the industry, market demand and foreign exchange rates in the future.

Please refer to the annual securities report, the summary of consolidated earnings report and the like for details on general uncertainty and fluctuating elements.
